Alex Masterton

FOR IMMEDIATE RELEASE

We are delighted to announce that Alex Masterton is the winner of our 2010 student bursary.

Alex has just completed Year 13 at the Grammar School, where he achieved 11 GCSEs and 4 grades A at AS level. He is currently awaiting the results for the 4 A levels which he sat in May this year. In October, Alex will set off for Bath University to study economics. As well as his academic achievements, Alex is a keen footballer and has played for Guernsey in the under 18 Muratti.

BWCI's HR Manager, Laura Fawcett said "Once again we were really impressed with the standard of the applicants for our bursary. We found it really difficult to choose this year's winner as all the students were of such a high calibre. Alex is certainly a very worthy recipient. As part of the bursary, Alex will work in a variety of departments within BWCI during his summer vacations, in order to gain an insight into all of the types of work that we do."

Alex said "The bursary will help to alleviate the extra cost of being an overseas student at university, whilst giving me the opportunity to learn about the work that BWCI does. I am extremely grateful to BWCI for this".

BWCI launched its bursary scheme in 2007 and Alex joins their two other current bursary students.

A Career as an Actuary

Actuaries apply financial and statistical theories to solve real business problems. These business problems typically involve analysing future financial events, especially when the amount of a future payment, or the timing of when it is paid, is uncertain. The traditional areas in which actuaries operate are: pensions, investment, life and general insurance. Actuaries are also increasingly moving into the other areas of the financial sector where their analytical skills can be employed.
